

Measure your ring size

Brynk R5 Glow · US size first, EU size (inner circumference in mm) in brackets

EU size = inner circumference in mm, rounded to whole sizes. Example: US 8 (57).

1. Check the print scale

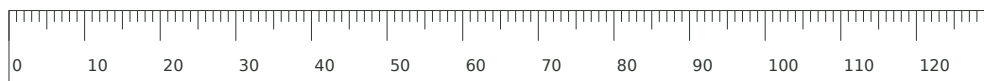

A4 · 100% / Actual size · do not use “Fit to page”.

Measured with a ruler, the check line must be exactly 100 mm long.

2. Cut out the paper strip and measure

Cut the strip out along the outer line. Wrap the 0 end around your finger, mark where it overlaps and read the circumference. Snug, but not tight.

Scale in millimeters. The ring must also fit over your knuckle.

3. Read off your size

Order the US size; the number in brackets is the matching EU size.

US 8 (EU 57)	US 9 (EU 60)	US 10 (EU 62)	US 11 (EU 65)	US 12 (EU 68)	US 13 (EU 70)
------------------------	------------------------	-------------------------	-------------------------	-------------------------	-------------------------

4. Alternatively: place a well-fitting ring on the circles

Compare the inner edge of your ring with the outer edge of the circle.

The circles show the stated inner diameter at actual size.

Inner Ø 18.2 mm

Inner Ø 19.0 mm

Inner Ø 19.9 mm

Inner Ø 20.7 mm

Inner Ø 21.5 mm

Inner Ø 22.2 mm

Measure in the afternoon. The R5 Glow runs large: between two sizes, choose the smaller one.

Measurements are approximate. If in doubt, ask us before you order.
